Professional Summary

Results-driven Lead Software Developer with expertise in architecting scalable enterprise solutions and leading high-performing agile teams. Proven ability to leverage technologies like C#, .NET Core, and JavaScript frameworks to deliver innovative systems and enhance business outcomes. Seeking to apply technical leadership and consulting skills to drive impactful results in a challenging new role.

Experience

Redmane Technology

2021 – Present

Lead Software Developer

Chicago, IL

- Architected and delivered a critical client-facing application using C, ASP.NET, and AngularJS, successfully processing approximately 100,000 documents in production without major issues or data loss.
- Enhanced framework scalability and feature robustness for enterprise solutions, leveraging expertise as an Umbraco Certified Professional.
- Led agile development practices, achieving zero-bug SIT/UAT phases for delivered applications and improving team velocity to address future sprint tasks ahead of schedule.

Elevator Media

2020 – 2020

Junior Full Stack Developer

Chicago, IL

- Developed scalable backend APIs using NestJS, including a module to automate social media posting upon new website article publication, enhancing platform engagement.
- Authored and published reusable internal JavaScript libraries to NPM to streamline development workflows.

Technical Skills

Languages: C#, JavaScript, TypeScript, SQL, Python, Go, Java, PHP, C++

Frameworks/Platforms: .NET Core, ReactJS, React Native, NestJS, AngularJS, Umbraco CMS, Tailwind CSS, AWS, Azure, GCP

Tools: Docker, Git, Jest, Postman, Formio

Databases: Microsoft SQL Server, MongoDB, PostgreSQL

Projects

SoundClip

Fall 2021 – Present

React Native, Supabase, PostgreSQL

Personal Project

- Developed a cross-platform mobile social media application using React Native for recording and sharing audio clips, featuring user profiles, content feeds, likes, and a following system. Utilized Supabase for backend services and PostgreSQL for data storage.

Can I Ride My Motorcycle?

2024

JavaScript, Node.js, Express, OpenWeatherMap API

Personal Project

- Developed a web application using Node.js and Express to advise motorcyclists on safe riding conditions by integrating the OpenWeatherMap API for real-time weather data (e.g., wind, precipitation) and generating safety recommendations.

Education

Loyola University of Chicago

2020 – 2021

M.S. in Computer Science (GPA: 3.9)

Chicago, IL

Loyola University of Chicago

2016 – 2020

B.S. in Computer Science

Chicago, IL
